

PRESS RELEASE

The Level 3 Musketeers

Date 4th February 2016

Vikki Urwin, 32, and Duncan Clarke, 43, are celebrating after gaining their level 3 for film and non-film radiography qualifications. Also Anita Andrews, 55, on the right in this picture, who is already a qualified level 3 for film has now completed her non-film level 3 exams. This is an important milestone for James Fisher NDT bringing on two new level 3 technicians who are under the average age for a level 3 in the industry of 50 whilst continuing to help Anita build on her experience and enhance her skill set.

“It’s a growing concern within the NDT profession that a high proportion of Level 3s are approaching retirement” Said Vikki Urwin when discussing her new qualification “Here at James Fisher NDT we are committed to building up the skills of our people so we can do our bit to offset this trend and ensure we can continue to offer our customers the best service and highest standards”.

UKAS and NADCAP accredited James Fisher NDT has its main facility in Deeside, near Chester, with supporting locations across the UK with over 15 fully equipped X-ray bays, offering a comprehensive radiography service to clients throughout the aerospace, automotive and other industries that rely on safety critical components. In addition JF NDT offers a wide range of other NDT inspection techniques such as ultrasonic, eddy current, penetrant and magnetic particle testing to more specialised methods such as Time of Flight Diffraction (TOFD), high resolution ultrasonic imaging and digital radiography.
