## An Olympic Success

Monday 20<sup>th</sup> August 2012

---

James Fisher NDT (JF NDT) successfully delivered radiological detection monitors to the Olympic Delivery Authority. "The programme delivery schedule was challenging" commented Dave Brown, JF NDT Project Manager. "It was made more difficult still by extremes of temperature and one of the wettest summers in recent years. However, despite all our difficulties, we have successfully completed all delivery and installation work on budget and in time for the games."

Rob Watson, JF NDT Services Manager commented "It was a terrific team performance. The on-site installation team was backed up by projects and logistics support. We also made extensive use of our Deeside calibration facility to test and prove all of the instrumentation before it was shipped".
